FINANCIAL PERFORMANCE ANALYTICS DASHBOARD

Business Intelligence Project | Data Analytics Portfolio

Objective

To analyze company financial performance across products, segments, countries, and time periods using interactive dashboards and key financial KPIs.gence Project | Data Analytics Portfolio

Presented by Archi Dholiya

Tools Used : Power BI | Excel | DAX | Data Visualization

BUSINESS PROBLEM

Organizations generate large volumes of financial data but often struggle to transform this data into clear and actionable insights.

Without proper analytics:

- Decision-makers cannot identify high-performing products
- Discount strategies may reduce profitability
- Regional performance differences remain unclear
- Revenue growth trends are difficult to monitor

PROJECT GOALS

To create a centralized financial analytics dashboard that helps stakeholders:

1. Monitor sales and profit performance
2. Analyze product profitability
3. Understand discount impact
4. Identify regional growth opportunities

DATASET OVERVIEW

The dataset used for this project contains financial performance data across different products, segments, and countries.

- **Business Dimensions** : Segment, Country, Product, Discount Band
- **Sales Metrics** : Units Sold, Manufacturing Price, Sale Price
- **Financial Metrics** : Gross Sales, Discounts, Sales, COGS (Cost of Goods Sold), Profit
- **Time Variables** : Date, Month, Year

PROJECT WORKFLOW

1. Data Collection :
Import Finance dataset.

2. Data Cleaning : Checked data types, Removed inconsistencies, Validated financial metrics

3. Data Transformation : Created calculated measures, Built time-based fields, Created KPIs

4. Data Modeling :
Built relationships between dimensions and measures.

5. Dashboard Design
Designed interactive Power BI dashboard pages.

6. Insight Generation :
Analyzed sales, profit, discount, and regional performance.

DASHBOARD ARCHITECTURE

1. Sales Overview :
Understanding revenue trends and product performance.

2. Profitability Analysis :
Evaluating profit margins and segment contribution.

3. Discount Analysis
Identifying how discounts impact profit.

4. Regional Performance
Understanding geographic revenue and profit distribution.

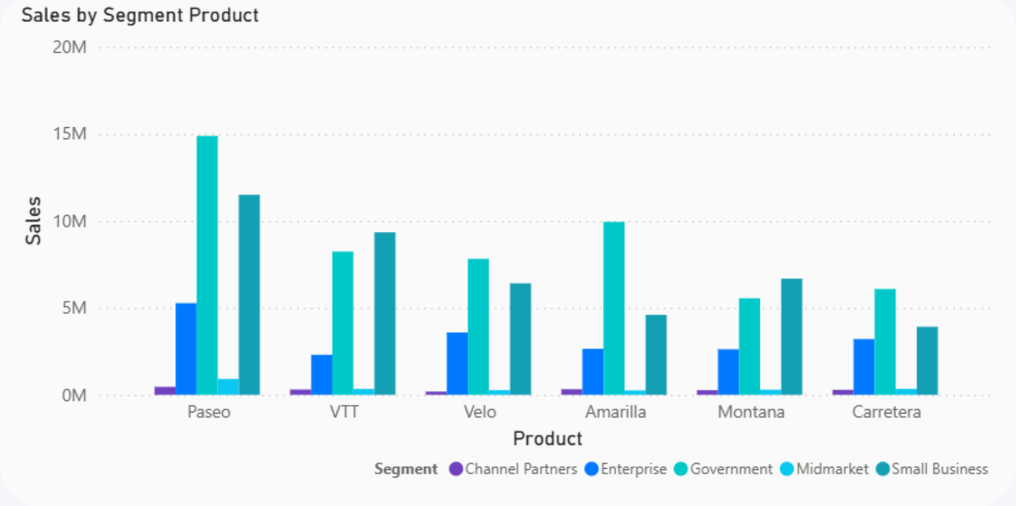
5. Strategic Summary
Key insights and business recommendations.

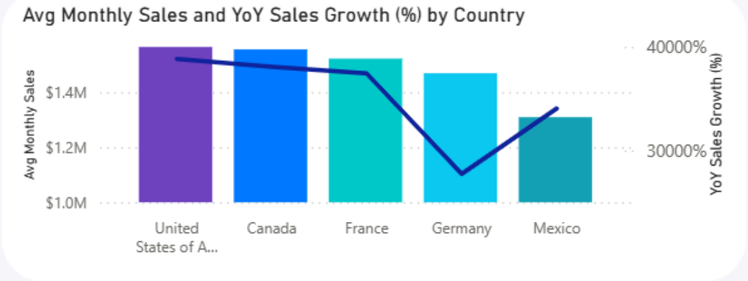
What's Driving Revenue?

"Explore sales trends over time, identify peak-performing segments and products, and monitor growth or decline across countries."

Executive Summary | **Sales Overview** | Profitability | Discount Analysis | Regional Analysis | Strategic Summary

$118.73M	1.13M	34946.13%	$7.42M
Total Sales	Total Units Sold	YoY Sales Growth (%)	Avg Monthly Sales

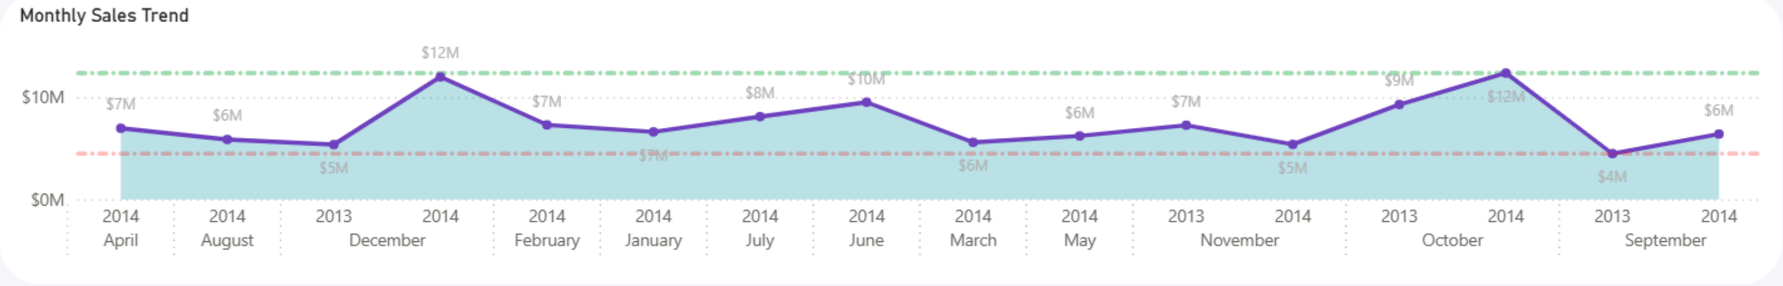




Narrative

Paseo in Segment Government made up 12.53% of Sum of Sales.

At $15,64,364.385625, United States of America had the highest Avg Monthly Sales and was 19.48% higher than Mexico, which had the



SALES OVERVIEW INSIGHTS

Key Metrics :

- Total Sales: $118.73M
- Total Units Sold: 1.13M
- Average Monthly Sales: $7.42M

Insights :

- Government segment contributes the largest portion of sales.
- Product Paseo generates the highest sales across segments.
- Monthly sales show seasonal fluctuations, with peaks around mid-year.
- The United States and Canada show strong revenue performance compared to other countries.

Executive Summary | Sales Overview | **Profitability** | Discount Analysis | Regional Analysis | Strategic Summary

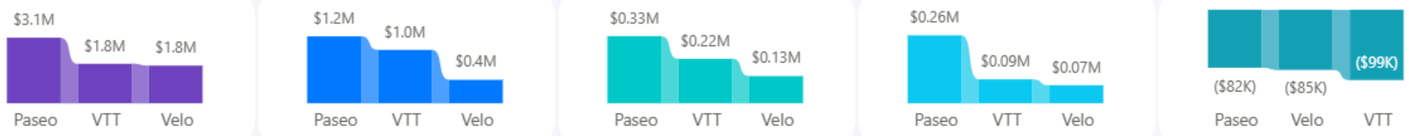
Is It Profitable?

"Segment-wise breakdown of total profit, margin quality, discount impact, and COGS efficiency."

$16.89M	14.23	85.77	Government
Total Profit	Avg. Profit Margin (%)	COGS to Sales Ratio (%)	Top Segment by Profit

	Government	Small Business	Channel Partners	Midmarket	Enterprise
Segment Profit Contribution (%)	65.04%	23.66%	07.52%	03.77%	00.00%
Profit ($)	11.39M	4.14M	1.32M	0.66M	-0.61M
Profit Margin (%)	21.69	9.77	73.13	27.71	-3.13
Profit Margin (%)	78.31	90.23	26.87	72.29	103.13
Discount (%)	6.91	7.65	6.95	7.77	6.92

Top 3 Products by Profit



Narrative

At $30,57,290.69, Paseo had the highest Total Profit and was 74.03% higher than Velo, which had the lowest Total Profit at $17,56,732.05.

PROFITABILITY ANALYSIS

Key Metrics :

- Total Profit: $16.89M
- Average Profit Margin: 14.23%
- Top Profit Segment: Government

Insights :

- Government segment contributes 65% of total profit.
- Enterprise segment shows negative profit, indicating pricing or cost issues.
- Product Paseo generates the highest profit contribution.
- Profit margin varies significantly between segments.

Discount & COGS Analysis

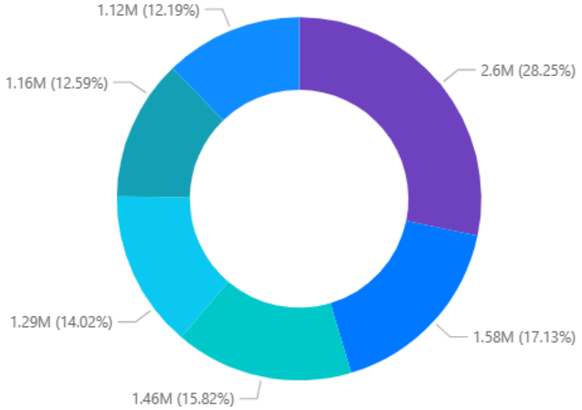
Uncover how discounts and cost of goods sold (COGS) affect overall profit — especially at the **product level**. Identify **over-discounted**, **high-cost**, and **low-margin** products.

Executive Summary | Sales Overview | Profitability | **Discount Analysis** | Regional Analysis | Strategic Summary

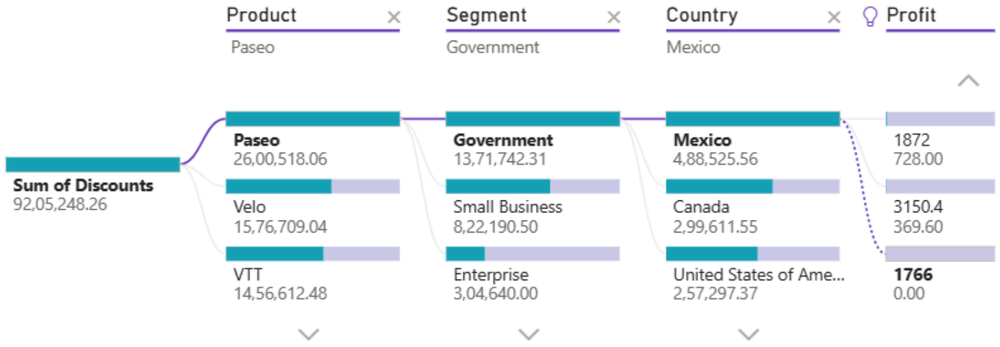
9.21M	7.20	0.92	9.21M
Total Discounts	Discount % (Gross Sales)	Discounted Units (%)	Discount Impact

"Who Gets the Most Discounts?"

Sum of Discounts by Product

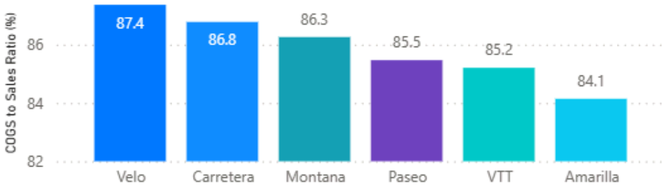


"Where Are Discounts Reducing Profit?"

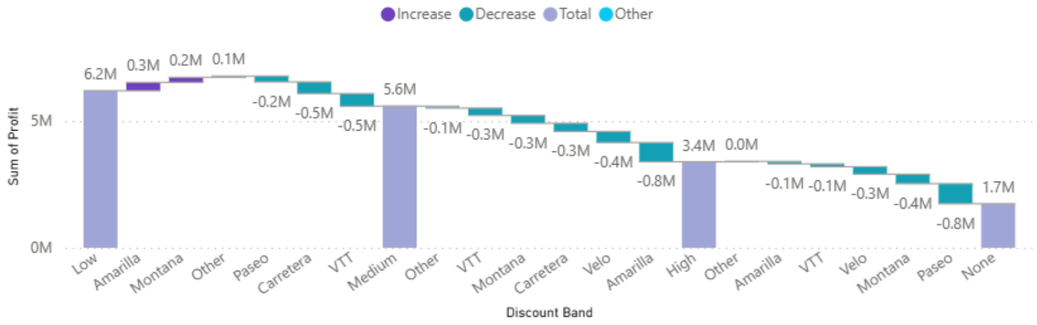


"Product Cost Burden"

COGS to Sales Ratio (%) by Product



"Discount Effect by Product Tier"



DISCOUNT & COST ANALYSIS

Key Metrics

- Total Discounts: $9.21M
- Discount Percentage: 7.2%
- Discount Impact: $9.21M

Insights

- Product Paseo receives the highest discount allocation.
- Higher discount bands reduce overall profitability.
- Some products show high COGS relative to sales, reducing margins.
- Discount strategies should be optimized to balance sales growth and profit.

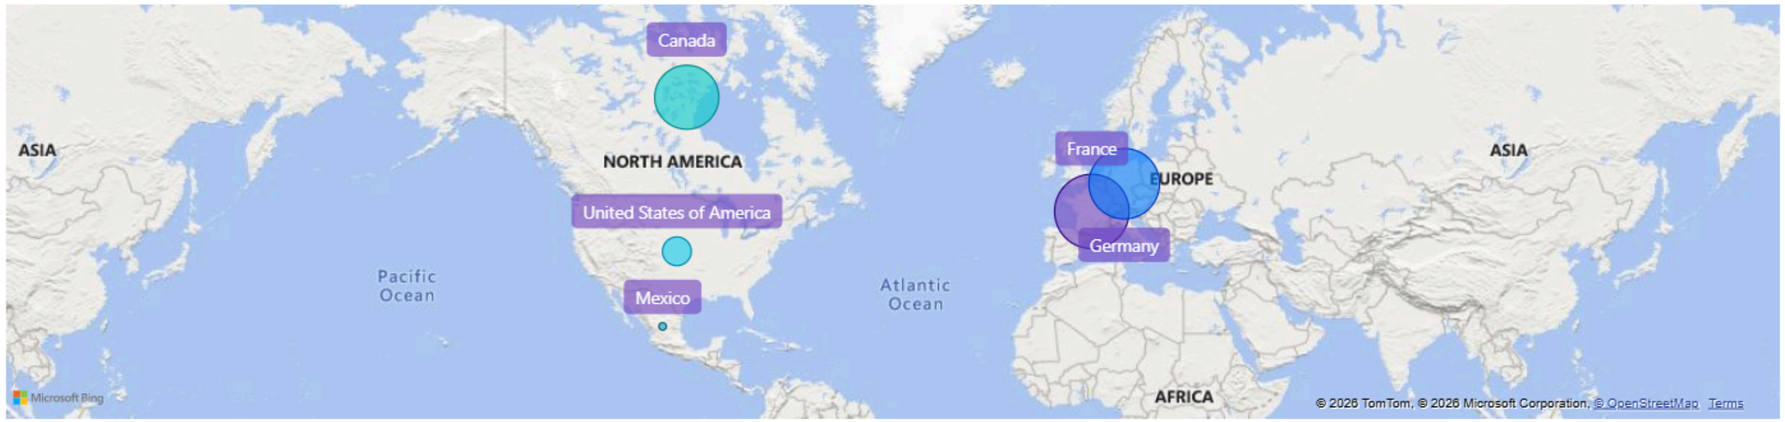
Regional Performance

Understand **country-wise performance** — where sales and profit are growing, where margins are low, and where opportunities lie for expansion or efficiency

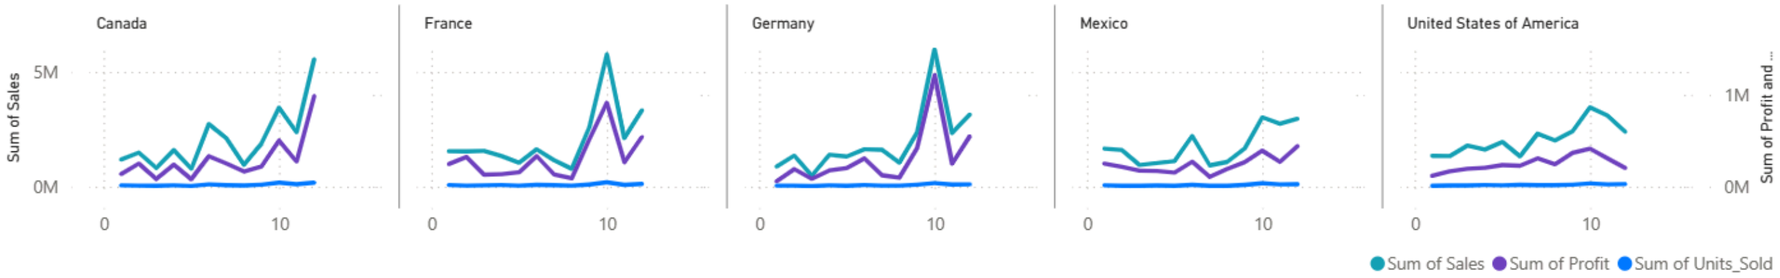
Executive Summary | Sales Overview | Profitability | Discount Analysis | **Regional Analysis** | Strategic Summary

5	$16.89M	14.23	France
Total Countries	Total Profit	Avg. Profit Margin (%)	Top Country by Profit

"Profit, Sales and Market Volume (Units) Distribution Across Countries"



Country France Germany Canada United States of America Mexico



REGIONAL PERFORMANCE ANALYSIS

Key Metrics

- Total Countries: 5
- Total Profit: $16.89M
- Top Country by Profit: France

Insights

- Europe markets (France and Germany) generate strong profit margins.
- Canada and the United States show high sales volume.
- Mexico shows lower profitability compared to other regions.
- Regional strategy should focus on expansion in high-performing markets.

TECHNOLOGIES USED

Power BI

- Dashboard development
- Interactive visualizations
- DAX calculations

Excel

- Data exploration
- Data validation

DAX (Data Analysis Expressions)

Used to calculate KPIs such as:

- Profit Margin
- Discount Percentage
- Cost to Sales Ratio
- Year-over-Year Growth , etc...

KEY BUSINESS INSIGHTS

📊 **Product Insight :**
Product Paseo is the top revenue and profit driver.

📉 **Profit Risk :**
Enterprise segment generates negative profit, indicating potential cost issues.

💰 **Discount Impact :**
High discount levels significantly impact profitability.

🌍 **Regional Performance :**
France and Germany show strong financial performance.

📅 **Sales Trend :**
Sales show clear monthly and seasonal fluctuations.

BUSINESS RECOMMENDATIONS

Optimize Discount Strategy

- Reduce excessive discounts on already high-performing products.

Improve Enterprise Segment Profitability

- Reevaluate pricing and cost structures.
- Expand in High Profit Regions
- Increase investment in France and Germany.

Focus on High Margin Products

- Prioritize marketing and sales for products with higher profit margins.

CONCLUSION

Project Outcome

This financial dashboard successfully transforms raw financial data into actionable business insights.

Key Achievements

- Built a fully interactive financial analytics dashboard
- Identified profit drivers and loss segments
- Analyzed discount impact on profitability
- Provided regional performance insights

THANK YOU
